

ALL-IN ACE

Purposeful, Methodical, Comprehensive

By resolving to get an early start on your ACT preparation, you're taking a **comprehensive** approach and no Test, topic, or question type is out of reach for you. Even with time on your side, you'll need a **purposeful** and **methodical** study plan to conquer the entire exam. Start practicing now so that, by test day, you'll be indomitable.

How to Use Your Study Plan: The study plan below is based on your results. Each week, the Recommended chapters cover the topics that are worth the most points on the ACT, so be sure to prioritize those items. To make your prep as efficient as possible, choose Optional items that best fit your study needs and schedule. If you fall behind or don't have 12 full weeks to study, be sure to prioritize the Recommended items. Happy prepping!

WEEKS 1-3

Foundations of the ACT

Knowing what to expect on each Test of the ACT will give you confidence on test day—you'll have no surprises about what types of questions you'll be asked. You will take a full practice test during these weeks; take the time to carefully review your results to give yourself an idea of where you stand on each section of the test.

During these weeks, you'll:

- Become comfortable with the structure of the ACT
- Take a diagnostic practice test
- Learn the Kaplan Methods for each test section

WEEKS 4-5

High-SmartPoints Topics

Let's cut right to the chase: some topics are tested on the ACT more heavily than others. Kaplan has assigned a SmartPoints number to each topic on the ACT—the higher the SmartPoints number, the more that topic is tested. That means that mastering those topics with the highest SmartPoints values has the potential to earn you a ton of points on test day.

During these weeks, you'll:

- Lay the groundwork for success in English and Math by studying high-SmartPoints topics
- Learn to identify every Reading question type
- Master the analysis of Science Data Representation passages

WEEKS 6-7

Areas of Opportunity

Now it's time to dig into some challenging topics. You can do this! Your goal is not to learn everything about, say, geometry or punctuation, but rather to learn the most commonly-tested ACT concepts and to familiarize yourself with questions in that category.

During these weeks, you'll:

- Improve your performance on your areas of opportunity in English, Math, and Science
- Expand your Reading skills by learning strategies for every question type

WEEK 8

Practice Test

You've worked hard and learned a lot over the previous weeks! Now, put that study to work on some authentic practice. Taking a practice test under real test-like conditions is the best way to solidify what you've learned and to practice test-taking strategies. Plus, your results will help you make a plan for your remaining weeks until test day.

Tips for Taking Practice Tests:

Make the practice test count! Time yourself, eliminate distractions, and use your test-taking strategies (see Chapter 1), just as you would for the real test. Practice using the Methods for each test section (English, Math, Reading, and Science) on every question—even if doing so takes more time now, practicing will improve your speed so the Methods are second nature on the real test day.

After finishing the practice test, it is vital that you *review your results*. Dig into each question—think not only about why you got a question correct or incorrect but also about whether you approached the question strategically. For each question, ask yourself: What can I learn about this type of question? Then use your results to help you plan your study until test day.

During this week, you'll:

- Take a practice test
- Review the practice test

WEEKS 9–10

Section Management

Congratulations! Here's the payoff for the time you spent taking and reviewing your practice test in Week 8. Use those results to choose new chapters to study and previously completed chapters to review. Weeks 9 and 10 are your last opportunity to focus on areas you find particularly challenging, so plan accordingly. From now until test day, you'll focus more and more on consolidating your ACT knowledge and learning strategies for each section of the test.

During these weeks, you'll:

- Begin learning section management strategies for each section of the ACT
- Complete your study of Reading and Science passage types

WEEKS 11-12

Strengths Focus

You've worked so hard! A few weeks left, but you are well-situated for success. Now things get kind of fun: take those topics you're awesome at, and get more awesome at them before test day! Celebrate your successes and take this opportunity to get even better. You'll also finish learning section management strategies and take one last practice test about a week before your test date. As usual, take the time to dig into your results. Finally, do some light practice leading up to the big day.

During these weeks, you'll:

- Focus on your strongest topics to build confidence for test day
- Take a practice test, about a week before your scheduled test day
- Do light practice until test day
