

# WORD WHIZ

*Productive, Focused, Energetic*

With a limited time before the test, you will need to **energetically** and **productively** advance through your available weeks of study. Even though you have more time to study during the week, you'll need to be **focused** on prioritizing your goals. Your study plan will help you build on your strong foundation in Verbal and strengthen the most important Math skills needed for success on test day.

**How to Use Your Study Plan:** The study plan below is based on your results, with your areas of opportunity on the left side of each week's plan and your areas of strength toward the right. Each week, the Recommended chapters cover the topics that are worth the most points on the SAT, so be sure to prioritize those items. To make your prep as efficient as possible, choose Optional items that best fit your study needs and schedule. If you fall behind or don't have 4 full weeks to study, be sure to prioritize the Recommended items. Happy prepping!

## WEEK 1

### Format of the SAT

Knowing what to expect on each section of the SAT will give you confidence on test day—you'll have no surprises about what types of questions you'll be asked.

During these weeks, you'll:

- Become comfortable with the structure of the SAT
- Learn the Kaplan Methods for each test section

## WEEK 2

### Highest-Yield Topics

Let's cut right to the chase: some topics are tested on the SAT more heavily than others. That means that mastering those topics has the potential to earn you a ton of points on test day.

During these weeks, you'll:

- Study the highest point yield topics in Math and Writing and Language
- Master the foundations of strategic Reading

## **WEEK 3**

### **Areas of Opportunity and Practice Test**

Now it's time to dig into some challenging topics. You can do this! Your goal is not to learn everything about, say, geometry or punctuation, but rather to learn the most commonly-tested SAT concepts and to familiarize yourself with questions in that category.

It's also time for some authentic practice. Taking a Practice Test under real test-like conditions is the best way to solidify what you've learned and to practice test-taking strategies. Plus, your results will help you make a plan for your remaining study time until test day.

#### **Tips for Taking Practice Tests:**

Make the Practice Test count! Time yourself, eliminate distractions, and use your test-taking strategies (see Chapter 1), just as you would for the real test. Practice using the Methods for each test section (Math, Reading, and Writing and Language) on every question—even if doing so takes more time now, practicing will improve your speed so the Methods are second nature on the real test day.

After finishing the Practice Test, it is vital that you *review your results*. Dig into each question—think not only about why you got a question correct or incorrect but also about whether you approached the question strategically. For each question, ask yourself: What can I learn about this type of question? After reviewing, use your test results to help you plan what to study until test day.

During these weeks, you'll:

- Take a Practice Test
- Review the Practice Test
- Improve your performance on your areas of opportunity on each section of the test

## WEEK 4

### Strengths Focus

You've worked so hard! There's only one week left, but you are well-situated for success. Now things get kind of fun: take those topics you're awesome at, and get more awesome at them before test day! Celebrate your successes and take this opportunity to get even better. You'll also learn section management strategies for each section of the SAT. Finally, do some light practice leading up to the big day.

During these weeks, you'll:

- Focus on your strongest topics to build confidence for test day
- Learn section management strategies for each section of the SAT
- Do light practice until test day

#### Week 4
